
Liquid Jet Ejectors For Process Gas Compression And

water jet eductors - schutte & koerting - water jet eductors bulletin 2m introduction the water jet eductor is a type of ejector which utilizes the kinetic energy of a pressurized liquid to entrain another liquid, mix the two, and discharge the mixture against a counter pressure. ejectors of this type are used throughout industry for pumping and mixing operations. application **selection of air ejectors - schutte & koerting** - selection of air ejectors part i. basic design, operating information, and operation limitations of air ejectors. by: c.g. blatchley schutte & koerting an ejector is a pump which uses the jet action of one fluid to entrain and compress another fluid. the high velocity primary stream is produced by expanding a high **liquid jet eductor - primetech ejectors** - the liquid jet eductor enables to lift, entrain and pump out a low pressure liquid utilizing a high pressure motive liquid. the high pressure motive liquid enters the motive chamber of the eductor through a converging motive nozzle. at the eductor nozzle, the pressure energy of the motive liquid is converted into a high velocity jet. **ejector technology for efficient and cost effective flare ...** - discusses using ejectors for fgr systems. while ejector technology has been utilized for many years in other services, the concept of utilizing it for fgr is relatively new. a variety of compressor technologies have been utilized for fgr systems including liquid ring, screw, reciprocating, and sliding vane. **a numerical analysis of novel liquid-gas jet ejector** - published literature on ejectors deals broadly with the design and performance of steam and liquid-jet ejectors. the reported work on gas-liquid jet ejectors with gas as the motive fluid and liquid as the entrained fluid is scanty. therefore, studies were undertaken to investigate hydrodynamic and mass **feasibility study of replacing steam ejector with liquid ...** - the performance to produce vacuum. and also studied about replacing liquid ring vacuum pump with steam ejector for saving the consumption of steam and also the maximum ratio of return on investment and the minimum initial investment will be needed. keywords: steam jet ejectors, modelling, and liquid ring vacuum pump. i. introduction **numerical investigation of a liquid-gas ejector in marine ...** - fluid) (gas, liquid, vapour or two-phase) by mean of other fluid know as primary or motive fluid. jet pump based on the type of primary and secondary fluid could be characterized as gas-gas, gas-liquid, and liquid-liquid jet ejectors. gas-liquid jet pumps are widely used due to their diversity of assembly choices, **jet pump technical data pumping liquids - arco engineering** - jet pump technical data pumping liquids this technical bulletin includes general information about penberthy jet pumps plus specific details for selecting the proper unit. the two basic series of penberthy jet pumps covered in this bulletin are used for pumping liquids only. **vacuum systems, steam jet ejectors & atmospheric air ejectors** - producing a coarse vacuum and the steam jet ejectors are used to create higher vacuum levels. transvac manufactures a comprehensive range of atmospheric air jet ejectors used to extend the operating range of liquid ring vacuum pumps. **engineering standard for process design of vacuum ...** - engineering standard for process design of vacuum equipment (vacuum pumps and steam jet - ejectors) original edition aug. 1993 this standard specification is reviewed and updated by the relevant technical committee on aug. 1998. the approved modifications are included in the present issue of ips. **standard ejectors - lutz-jesco** - standard ejectors mb/bw 2 31 01 / 1 general ... the water jet pump or ejector as it is commonly known has proved its value here for decades, since the ejector does not have any moving parts subject to wear and because it not only generates a vacuum, but also mixes the chlorine gas and water. the water **ejectors systems - chem process system** - liquid jet ejectors are specially designed to operate using water, solvent or any others clear liquid and generate vacuum corresponding to the vapor pressure of the liquid. liquid jet ejectors are most suitable for low non-condensable and high condensable loads in applications like distillation and evaporation. ... **gas ejector modeling for design and analysis** - gas ejector modeling for design and analysis. (december 2008) chaqing liao, b.s., zhejiang university; m.e., texas a&m university chair of advisory committee: dr. frederick r. best a generalized ejector model was successfully developed for gas ejector design and performance analysis. previous 1-d analytical models can be derived from this new
